Watchlist Upload Common Errors

Last updated by | Naser Mohammed | Mar 19, 2023 at 7:18 AM CDT

Common Errors:

When uploading a watchlist file (CSV), validation is performed. UX exceptions are displayed to the user when some of the following errors are found during validation:

1. Uploaded file is empty.
2. File has invalid content
   a. File has metadata, and no header
   b. File has metadata and header but no rows data
   c. Uploaded file does not contain enough lines, base on value of [numberOfLinesToSkip] field
3. File has headers but does contain rows data
4. Uploaded file has more than 50 columns.
5. Some rows in the CSV file end with a comma character
6. Some headings (columns names) are empty
7. Some rows have more elements that the max count of columns.

Additional exceptions may be triggered from our backend infrastructure in situations where:

1. File size is beyond the authorized limit of 3.8MB
2. File has duplicate headers names
3. Some records/rows are missing fields data
